

# Vacancy Report Headline Figures - April 2020

Australian Government

## 94,300

Trend job advertisement count,  
April 2020

Change over the year

## ↓46.1%

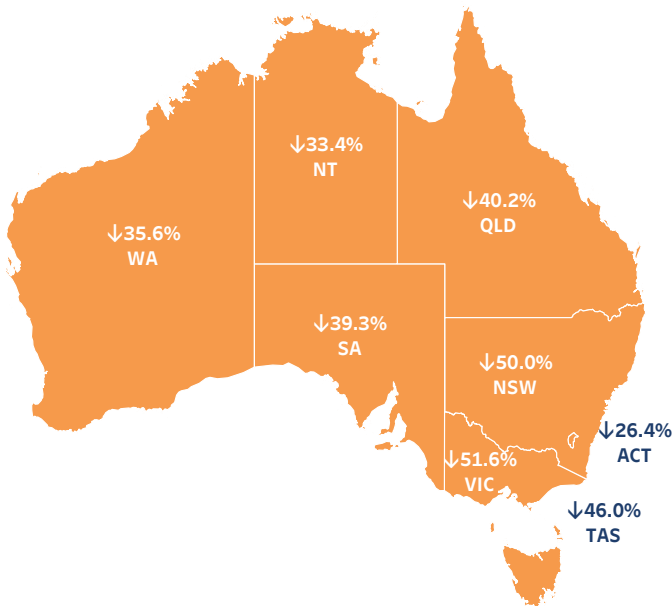

(or 80,600 job advertisements)

Change over the month

## ↓16.4%

(or 18,400 job advertisements)

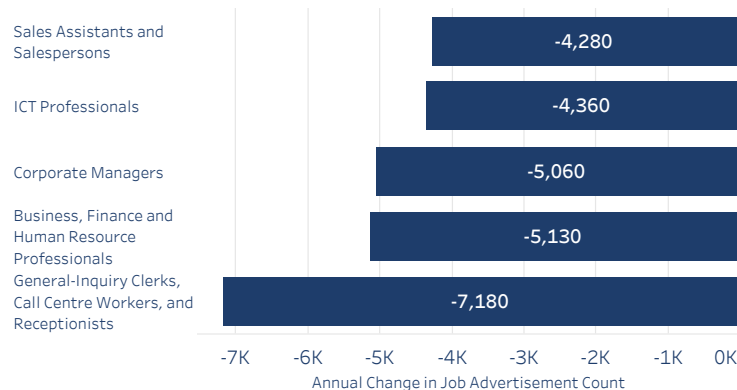

### Annual Growth, by State / Territory

### Job Advertisements, by Major Occupational Group

### Largest Annual Decline, by Detailed Occupational Group

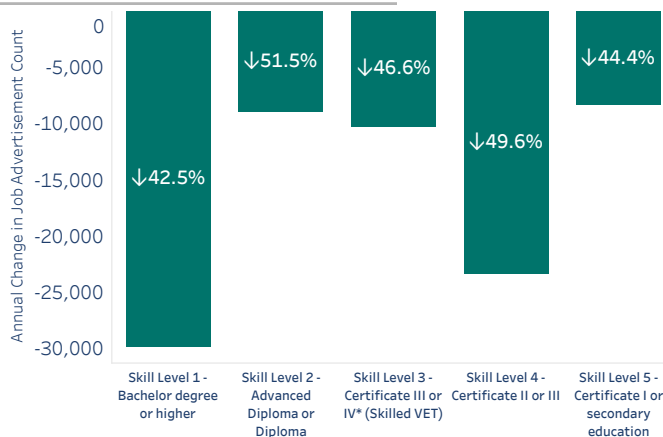

#### COVID-19 Series Impact Note

The "Largest Annual Growth, by Detailed Occupation" chart has been omitted from the April 2020 IVI Factsheet as job advertisements for all detailed occupational groups declined over the year to April 2020.

However, recruitment activity continues in the Australian labour market, with 66,900 seasonally adjusted job advertisements newly lodged on the job boards monitored by the Department of Education, Skills and Employment in April 2020. For Vacancy Report users interested in the opportunities available for job seekers, the department has developed a Jobs Hub page and constructed a visualisation of the IVI data showing the top 10 detailed occupations by seasonally adjusted job advertisement counts for each state and territory. Both these resources are linked below.
